Education

VIT Bhopal University (9.14 CGPA) <i>Bachelor of Technology in Computer Science and Engineering (Core)</i>	Sehore, India Sept 2023 – July 2027
St. Xavier's Higher Secondary School (X: 94.66%) <i>Class IX – Class X</i>	Bettiah, India June 2019 – June 2021
Jeewan Public School (XII: 89.6%) <i>Class XI – Class XII</i>	Motihari, India June 2021 – June 2023

Projects

Autonomous Traffic Flow Optimizer <i>Python, PyTorch, RL Agent</i> Github Demo	May 2026 – June 2026
- Trained a PPO agent on a custom Gymnasium environment (200K timesteps), cutting average queue length by 14.3% vs. fixed-timer baseline. - Deployed model as a serverless inference API (FastAPI, Docker, AWS Lambda, ECR) with a real-time Streamlit dashboard for RL vs. fixed-timer comparison.	
Pneumonia Detection from Chest X-Rays <i>Python, Flask, TensorFlow/Keras</i> Github	Sept 2024 – Dec 2024
- Built the Flask backend for a team-developed pneumonia detection system, integrating a CNN model (trained by teammates) into a web application for real-time X-ray analysis. - Designed routes to handle image upload, preprocessing, and inference, rendering predictions via HTML templates for a dataset of 5,000+ chest X-ray images.	
CustemAI: Hyper-Personalized Marketing Engine <i>React.js, Tailwind</i> Github Demo	June 2026 – July 2026
- Engineered a high-speed AI personalization platform using React.js and the Groq API (LLaMA 3.3 70B) to generate dynamic, multi-channel marketing payloads (Email, Push, Display) with millisecond latency. - Built predictive engagement scoring using Recharts and implemented micro-persona targeting, enabling the seamless export of structured JSON assets for integration into enterprise systems like Epsilon's COREai.	

Achievements & Certifications

Academic Excellence – Achieved a 9.73 GPA in Semester 4, securing 'S' grades in core subjects including Operating Systems and DBMS
Bronze Medalist – <i>Google Olympics</i> : Placed in The Ultimate Tech and Sports Challenge at VIT Bhopal. Link
AWS Certified Solutions Architect Link
AWS Certified AI Practitioner Link
NPTEL Marketing Analytics – Gold and Top 5% Topper Link
NPTEL Introduction to Machine Learning – Silver and Top 5% Topper Link

Technical Skills

Programming Languages: Java, Python, MySQL, HTML, CSS, JavaScript
Frameworks & Libraries: TensorFlow, Keras, PyTorch, FlaskAPI
Tools & Technologies: Github, LaTeX Overleaf, Streamlit, Docker, AWS
AWS Cloud: EC2, Lambda, ECR, S3, CloudFront, Queue, Load Balancing
Concepts: AI and Machine Learning, Data Structures and Algorithm, Proficiency in System Design, CI/CD Pipelines

Experience

Event Anchor, Ekfraseis Dramatics Society	2025
<i>Rangmanch 2025 - Flagship Cultural Event</i>	Bhopal, India
- Hosted the flagship cultural event, managing program flow and engaging an audience of 500+ attendees throughout the show. - Coordinated seamless transitions between performances, ensuring consistent pacing and audience engagement across the event.
